About Me

I am Amjad Ataallah, a Software Engineer and PhD student in Engineering of Complex Systems at the University of Salento. My academic and technical work focuses on healthcare data spaces, interoperability, software engineering, and modern data architectures.

Research

My current PhD research focuses on interoperability in healthcare data spaces.

Current Research Topics

- Healthcare Data Spaces
- Semantic and Data Interoperability
- Healthcare Data Models and Standards
- HL7 FHIR
- OMOP Common Data Model
- openEHR
- Reference Architectures for Healthcare Interoperability

Systematic Mapping Study

I am working on a systematic mapping study titled **“Interoperability Data Models for Healthcare Data Spaces: A Systematic Mapping Study.”**

Education

Degree	Program	University	Department	Country	Period
PhD	Engineering of Complex Systems	University of Salento	Department of Innovation Engineering	Italy	2026 - Present
Master	Health Informatics	Arab American University	Department of Health Information	Palestine	2019 - 2021
Bachelore	Computer Science	An-Najah National University	Department of IT	Palestine	2002 - 2006

Academic Activities

1. Systematic Mapping Studies and Systematic Literature Reviews
2. Data Mining and Machine Learning
3. Optimization
4. Bibliographic Analysis
5. Technical and Scientific Communication

Projects & Technical Experience

Healthcare Data Space

Working on the design and deployment of a healthcare data space involving identity, authentication, contract negotiation, data transfer, federated catalogs, and auditing.

Laboratory Registration & Payment Platform

Worked on a laboratory materials and devices registration platform with Java Spring Boot and a modern web frontend, including invoice and E-Sadad payment workflows.

LabBook

Developed a web application using Java Spring Boot, React, and PostgreSQL with authentication, user profiles, roles, and laboratory-related modules.

DHIS2

Worked on DHIS2 tracker and capture solutions for healthcare and laboratory programs, including data collection workflows and reporting.

Technical Interests

- Software Engineering
- Java & Spring Boot
- React
- PostgreSQL

- Docker & Kubernetes
- Healthcare Interoperability
- Data Spaces
- Artificial Intelligence & Machine Learning
- Git & GitHub
